

The E-Tainer® Line: Advantages Generations Will Appreciate

Innovation Doing More with Less.

KLW Plastics' commitment to customer satisfaction is fulfilled through our focus on the key attributes of: **Quality, Service, Technology and Sustainability.**

While these values are at work in all of our products and initiatives, highly innovative sustainable packaging solutions are centralized under our E-Tainer® product line. E-Tainer products and packaging solutions are specifically designed to meet UN approved standards and packaging demands while offering significant environmental sustainability advantages, including:

- Reduced material consumption
- Utilization and replenishment of recycled materials
- Reduced material waste
- Reduced weight and, resulting, transportation energy/cost
- Reduced energy use

The E-Tainer® Line

Customers find that the E-Tainer® line is a complement to and extension of our traditional products and services. It provides our customers with a line of sustainable packaging solutions that continue to add value throughout the supply chain. The E-Tainer product line is made up of single and multi-material packaging solutions, including:

E-Tainer® Tight-Head

The new, UN approved E-Tainer multi-layer container, an exclusive product of KWL Plastics, features a core layer of post-consumer resin (PCR) molded between two layers of 100% virgin resin on the interior and exterior surfaces.

E-Tainer® Global

This next generation tight-head container from KWL Plastics features smooth, European inspired design and the remarkable combination of lighter standard gram weight and less plastic, yet with greater container strength.

E-Tainer® Hybrid

A mainstay of the E-Tainer product line, KWL Plastics' E-Tainer Hybrid combines a lightweight, rigid, plastic container with a sturdy, corrugated housing.

E-Tainer® Kube

Combining a semi-rigid, collapsible plastic bladder within a sturdy, corrugated housing, the E-Tainer Kube delivers in-use convenience with less plastic use, reduced storage and reduced transportation cost.

E-Tainer® Flex

A flexible packaging solution designed for a number of different applications, the E-Tainer Flex combines a poly bag with a sturdy, corrugated housing.
