

E-Tainer® Multi-Layer Manufacturing Technology

The new E-Tainer® multi-layer container, an exclusive product of K LW Plastics, features a core layer of post-consumer resin (PCR) molded between two layers of 100% virgin resin on the interior and exterior surfaces. Available in two product options:

• TI2076TEWHNVRVS

- Multi-layer, 60% PCR – 40% Virgin
- 1,250g
- 20L, 5 gallon
- Integrated handle
- 70mm tamper evident neck – Rieke FS76TE
- White
- Closed vent stem, 22mm back vent
- UN Regulated – Y1.8 100
- View Stripe

• TI2070NTWHVERVS

- Multi-layer, 60% PCR – 40% Virgin
- 1,250g
- 20L, 5 gallon
- Integrated handle
- 70mm non-tamper evident neck – Rieke FS70NT
- White
- Open vent stem, 22mm back vent
- UN Regulated – Y1.8 100
- View Stripe

Notes:

- Only available from our Fairburn, GA plant
- Must order in Truckload quantity – 3,492 w/ caps
- Must use Rieke cap – either the FS76TE or the FS70NT

Options:

- **Gram weight** – Can produce higher gram weight containers without new UN certification. Lower gram weight containers will require new UN certification (additional costs may apply).
- **Neck finish** – all neck sizes available besides IB2
***Will require new UN certification (additional costs may apply)
- **Vent options** – only available in the 22mm vent
- **Color** – Other colors available (additional costs may apply)
- **View Stripe** – Can produce bottles with or without this option
