

The E-Tainer® Global

Innovative Packaging: Creating a Sustainable Future

The new E-Tainer® Global is the next generation tight-head container from K LW Plastics. Its unique design creates a stronger container while allowing for source reduction. This unique product technology underscores our ongoing commitment to providing innovative and sustainable packaging solutions. The benefits are significant

- The improved bottle design creates a stronger container that has a lighter standard gram weight and uses less plastic
- The E-Tainer Global palletizes with no overhang on a 40 x 48 pallet
- Unique product technology creates a higher UN rated bottle with a smooth body cavity and no shim lines
- Utilizing a “European” inspired design creates a uniformed appearance as the product travels overseas

The E-Tainer Global is offered in 3.5 thru 7 gallon sizes with a variety of neck sizes, neck finishes, vent and color options available.

Common Industries:

- Janitorial and Sanitation
- Agricultural Chemicals
- Contract Manufacturing
- Industrial Chemicals

New bottle design allows for lighter weight container with improved performance
