

E-Tainer® Hybrid: Bottle within a Box.

Sustainable Benefits Inside and Out.

A mainstay of the E-Tainer® product line, K LW Plastics' E-Tainer Hybrid combines a lightweight, rigid, plastic container with a sturdy, corrugated housing to deliver environmental benefits in four ways:

- Less plastic
- Less energy in production
- Fully recyclable corrugated
- Corrugated weighs up to 30% less, while maintaining container strength and integrity.

The unique product technology of the E-Tainer Hybrid is available only from K LW Plastics, underscoring our ongoing commitment to manufacturing technology leadership and sustainability.

Common Industries:

- Industrial Chemicals
- Edible Oils
- Janitorial & Sanitation
- Agricultural Chemicals
- Inks and Coatings

Available with or without the corrugated housing, the E-Tainer Hybrid is a UPS friendly, versatile and cost efficient packaging option serving a variety of uses and environmental sustainability goals.

8-Sided Corrugated Box
Weighs up to 30% less while maintaining container strength and integrity.

E-Tainer® Hybrid Options

Applications

Edible oils, flavorings, Industrial chemicals, agricultural chemicals, inks, coatings, janitorial and sanitation, and other applications.
